## Type

Explain = request for a modification of the implementation instruction

Incident = a question/malfunction is reported and needs to be investigated

Bug = an incident has been investigated and the cause is an error. The detected error must be resolved

Upgrade = technically necessary adjustments in the context of a product's lifecycle

Change = extension of functionality (improved or new) that makes the product/service more valuable for the end customer

Sprint = time interval / time window in which a set of - improvements - upgrades - bugs etc. etc) go live

A release has different stages: development - (technical) testing - acceptance (by users) - going life.
